COMPANY PROFILE

PT. ARTA SINERGI TEKNOLOGI

OVERVIEW

PT ARTA SINERGI TEKNOLOGI (Artasinerigi) was established in mid-2021 to satisfy the demand for a flexible and customer-focused specialist pump and valve supplier. We accurately assess each application and recommend the best possible solution without being limited to the range of any particular product line. Artasinerigi has developed its knowledge and services, and is now firmly established as a leading supplier to the industrial segment, with an emphasis on the food processing and pharmaceutical industries, and a full range of pumping equipment and valves.

With about 20 years of expertise in pump hydraulics and a detailed understanding of electrical process controls and mechanical design principles enables Artasinerigi to engineer complete pumping solutions. Due to their extensive experience in the industrial sector, Grundfos, Denmark's largest pump manufacturer, has named PT ARTA SINERGI TEKNOLOGI (Artasinerigi) as its Business Partner for industrial segments. GENE BRE, a sanitary and industrial valve manufacturer based in Barcelona, Spain, has also given Artasinerigi a dealership. This will provide us a stronger market position and the capacity to provide better services.

Artasinerigi has a reputation for quick and accurate responses to inquiries, on-time deliveries, competitive pricing, and excellent after-sales service. 2 x 24 hours is our normal response time.

MISSION, VISION & VALUES

Our Mission

Offering high quality products and value-added service to our customers

Our Vision

By focusing on customers' needs it is our vision to generate further sustainable and viable growth

Our Value

Offering better solution with a strong commitment and aftersales support to ensure customer satisfaction

VALUE ENGINEERING

We offer application, installation, and troubleshooting consultation for water, wastewater, and water treatment systems in the industry. Our goal is to supply you with the best equipment for your application at a reasonable price. Whether it's a bid/spec, design/build, repair, or retrofit project, we'll be there to help you every step of the way.

INDUSTRIAL PUMPING SOLUTIONS

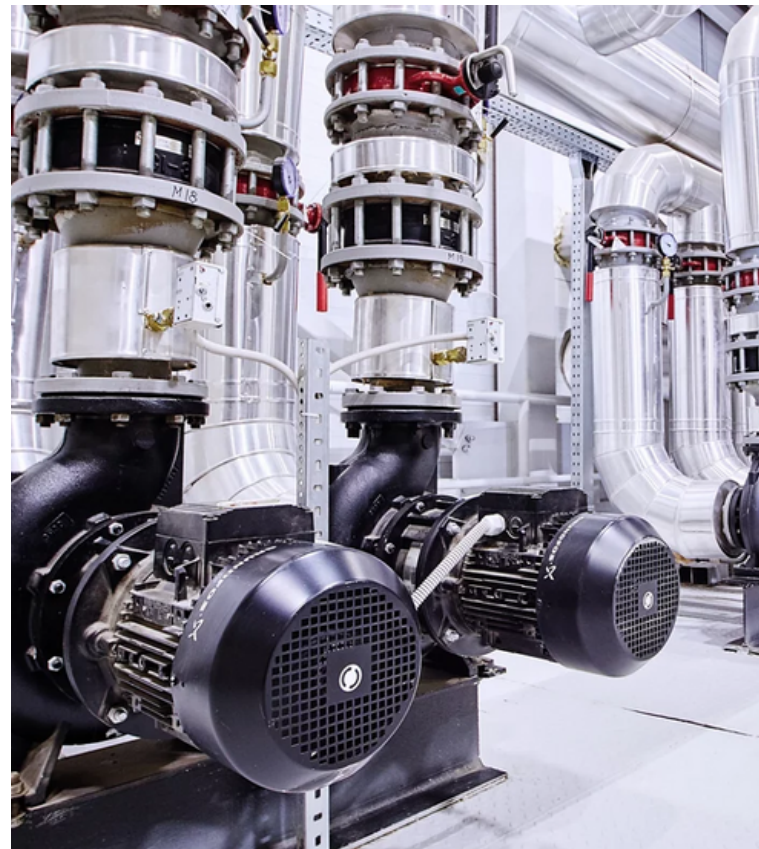

The importance of efficient pumping systems has increased in the industry as a means of delivering high-quality water while remaining ecologically mindful. Submersible, centrifugal, vertical multi-stage pumps, and many other types of pumps are available. Our knowledge and experience can help designers, consultants, contractors and end users choose the right pumps, valves, and pumping systems. 2 x 24 hours is our normal response time .

FIELD SUPPORT

Artasinergi provides pump and control diagnostics and troubleshooting support. Our factory trained sales people offer pump and control start-up support. Experienced factory trained technicians offer pump repair service on multistage, submersibles, end suction, split case, wastewater and other pumps. We also provide pick-up and delivery of your pumps as well as 24-hour emergency service.

UNDERSTAND YOUR BUSINESS

We can help you in any area, no matter what industry you're in. Our professionals have years of experience with industrial applications and installations. These are some of the industries we've worked in.
